Brief description of the problem

B Braun is initiating a recall of certain batches of the above products as a precautionary measure. This is because ongoing product monitoring has identified that some bags may not comply with the required specification throughout the product shelf-life.

Some unlicensed products have been manufactured by adding supplements to potentially affected Nutriflex Omega Plus and Nutriflex Omega Special bags, therefore certain batches of supplemented products are also being recalled.

Advice for healthcare professionals

Please check your inventory for the listed batches of both licensed and unlicensed products and quarantine and discontinue use of any affected stock immediately. Please return affected stock to your supplier using your suppliers approved process.
