Active Pharmaceutical Ingredient: desmopressin acetate

Brief description of the problem

Ferring Pharmaceuticals Limited is recalling all unexpired stock of the above batches of products from pharmacies and wholesalers as a precautionary measure due to a lower volume of solution being observed in the bottles, and out of specification results for the content of the desmopressin acetate (active substance) and benzalkonium chloride (excipient).

Advice for healthcare professionals

Stop supplying the above batches immediately. Quarantine all remaining stock and return these to your supplier using your supplier's approved process.
