

## F M D A L E R T

### CLASS 4 MEDICINES DEFECT INFORMATION

#### Caution in Use

#### Distribute to Pharmacy Level

Dear Healthcare Professional

**Accord Healthcare Ltd.**

**PL 20075/0675**

**Diamorphine Hydrochloride BP 100 mg Lyophilisate for Solution  
for Injection**

Batch Number	Expiry Date	Pack Size
F19160	05/2022	1× 5 Ampoules
F19161	05/2022	1× 5 Ampoules

#### **Brief description of the problem**

Accord Healthcare Ltd has informed us of an issue related to the expiry date for the above batches, which has not been encoded in 2D data matrix. Upon **FMD scanning verification and decommissioning** the product, errors such as: ***‘Invalid barcode, missing required data elements’*** or ***“Scan failed”*** or ***“Invalid entry”*** will appear. Due to difference in the end user systems; each system will display a different message from the NMVS Alert code, and this should be expected for these two batches only.

The human readable format is correct to the batch requirements and there are no concerns related to the product quality.

#### **Advice for Healthcare Professionals**

- Attempts to scan to verify or to verify and decommission the FMD 2D Data Matrix code on the pack will result in an ‘Alert’ or a failed scan. Please perform the usual checks for falsified medicines according to the FMD Source\*\* guidance and dispense if deemed acceptable based on these checks.

- Due to inadequate supply of alternative products, the product is not being recalled. This issue only affects the batches listed above and all future batches will be corrected to avoid this error.

**Company contacts for further information**

For more information or medical information queries, please contact: Accord Medical Information Department on 01271 385257.

Recipients of this Drug Alert should bring it to the attention of relevant contacts by copy of this letter.

RQIA should bring this information to the attention of private hospitals/clinics registered with them and any other relevant care facilities

The Business Services Organisation is asked to bring this information to the attention of Community Pharmacists and General Medical Practitioners directly.

Recipients of this Drug Alert should bring it to the attention of relevant contacts by copy of this letter.
