

General Pharmaceutical Services Quarterly Series to Q3 2022/23 (2022/23 Figures Provisional)

Prescription Items A prescription item is a single supply of a medicine, dressing or appliance written on a prescription form. If a prescription form includes three medicines it is counted as three prescription items. Only prescriptions that are subsequently dispensed are included in the dataset.

Ingredient Cost The ingredient cost refers to the list price of the drug, excluding VAT. It does not take into account any contract prices or discounts, dispensing costs or fees and will not necessarily reflect the actual amount that has been paid.

There were **11.24 million** items dispensed in the community in Northern Ireland during the period October to December 2022.

An increase of **1.3%** on the previous quarter

An increase of **2.4%** on the same quarter in 2021/22

The total ingredient cost for prescription items dispensed in Northern Ireland during October to December 2022 was **£124 million**.

An increase of **3.3%** on the previous quarter

An increase of **8.9%** on the same quarter in 2021/22
