Dear colleague

RE: Clenil[®] Modulite[®] 100mcg batch variation –Key Dispensing Points

Chiesi UK have written to all healthcare professionals advising that the MHRA have approved release of additional batches of Clenil[®] Modulite[®] 100mcg due to the recent increase in demand.

These batches are different to those normally provided in the UK in two ways:

- **Appearance** (see images below)
- Inhalers **do not have a dose indicator**.

Full details of concerned batch numbers can be found at the following website link:

<https://www.chiesi.uk.com/supply-of-chiesi-products>

Pharmacists are reminded to:

- Check the strength of the Clenil 100mcg inhaler prior to dispensing as the Clenil 100mcg is a very similar colour to Clenil 50mcg (for these batches).
- Make patients aware of the changes in appearance for these batches of inhalers upon dispensing
- **Label both the inner and outer packaging (as there is no embossed product/strength information on the plastic actuator)**

Please contact Medical Information (medinfo.UK@chiesi.com) should you have any further questions or require additional information.
