

Team Name:
WAREHOUSE ADMIN TEAM

Nominating Manager:
PATRICK MULHERN

WAREHOUSE SPACE OPTIMISATION PROJECT

SITUATION

- PaLS Boucher Warehouse racking systems not adequate to deal with high volume lines
- Inefficient stock holding
- Product didn't fit in locations
- Delays in goods delivered to end user.

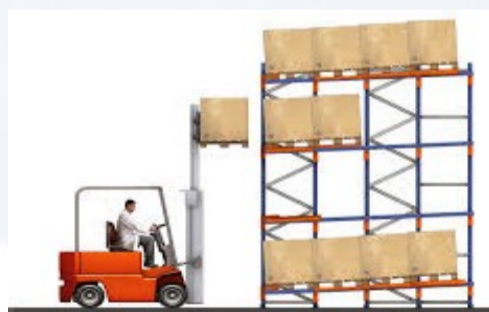

TASK

- Identify new High Density Storage systems
- Purchase new racking
- Plan layout to optimise space efficiency
- Develop plan for slotting high usage products in optimum picking locations

ACTIONS

- New High Density Storage purchased
- Construction & installation of racking complete
- High usage products slotted into optimum picking locations

RESULTS

- Optimised storage and pick efficiency
- Greater volume of inventory held within the same footprint
- Travel distance reduced for warehouse operatives
- Supply chain efficiency optimised resulting in a better service for our customers

- New more efficient pick paths Developed
